

Item	Explanation
Resource Action Number	Use a logical numbering sequence to track Resource Actions
Category	Use the following to categorize the resource action: 1=RA is complete and ready for more detailed evaluation; 2= Waiting for Study data results (identify date due); 3=Needs new information (adaptive management, new study, basic science development; 4=Not recommended for Further Analysis (not realistic, redundant or covered by another RA, not quantifiable problem)
Title of Proposed Resource Action	Taken from completed Resource Action Identification Form
Description of Proposed Resource Action	Describe proposed Resource Action
P/M/E	X=Protection or Mitigation measure; E=Enhancement measure
Nexus to Project 2100	Does the proposed Resource Action have nexus with Project 2100?
Flow/Reservoir Level	F=Resource Action is tied to flow, flow pattern, flow magnitude, flow changes; RL=Resource Action is tied to reservoir level
Impact to Existing Project Operations	Low, medium or high and note in Comments what impact is expected
Construction	X if construction will be required
O&M	If there will be continuing or annual operations and maintenance costs, 1 = one time; 0 = ongoing
Environmental Documentation	X if it requires environmental permits beyond the NEPA/CEQA evaluation for relicensing - later we'll add which specific permits will be needed
Change APE?	Would the proposed Resource Action result in a change to the APE?
Costs	Identify estimated cost range for Resource Action, including construction costs, operations and maintenance (for example, less than \$500k; \$10-12 million, etc.)
Potential Cross-Resource Impact	Using the following code, indicate any potential conflicts with other resources: LULMA=Land Use/Land Management/Aesthetics; E=Environmental; RS=Recreation and Socioeconomics; EO=Engineering and Operations
Acquisition/Easement	X if additional land or easement (outside of the existing Project Boundary) would be necessary for the Resource Action. No X in this column means the Resource Action is within the Project Boundary.
Partnering/Investment	M=opportunity for multi-agency partnering, P=private investment (e.g., concessionaires)
Contact Person	Include name of RAIF submitter
Comments	General comments include cross-resource issues
